LETTER OF RECOMMENDATION

I am delighted to write this letter of recommendation for **Ms.Kavya Parvathaneni**. As a Professor and Head of Computer Science Department, I have known her for four years while she was my student in Gudlavalleru Engineering College. I have come to know her quite well, having interacted with her in consecutive semesters. It is no surprise that she has chosen to continue her studies after her industrial experience in Accenture for 19 Months.

As a Head of Department besides providing the academic knowledge, I am responsible to ensure that my students get wide industry acceptance based on their personal and professional insights, by the end bachelor's degree. Kavya is one of the few students from the department who was offered in 3 Multi-National Companies in the same year 2019 namely Atos Syntel and Teach Mahindra and Accenture . She used to take initiative to participate in various workshops conducted in college.

Based on my Observation, in additional to her exceptional academic excellence her leadership skills came to forefront in group projects where she took charge assuming the majority of the work and responsibility, ensuring that everything is completed in a timely manner and to her high Standards. I find Kavya as a student with immense potential as she got an opportunity to do Internship with EMC Educate, which will help her succeed in her Endeavour's towards obtaining a Master's degree .

I find Kavya to be a highly talented individual. She is an intellectual student with technical and social outlook. I can decidedly say that she is one of the best students I have worked with in the past few years. I would strongly recommend her candidature for the program with a strong belief that she would prove to be valuable addition to your University.
